Payments          Reconciliation          Ledgers

**RISE Engine**

RISE ENGINE

# Bring Intelligence to Financial Data

The RISE Engine powers our platform, providing real-time intelligence to financial workflows.
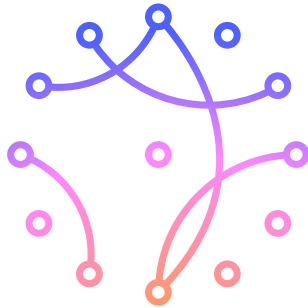

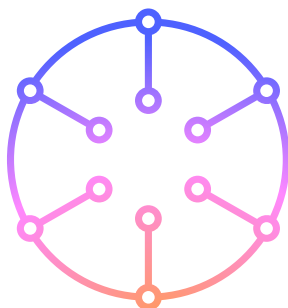

## Relays

Relays data in real-time across banks, payment processors, internal systems, and more.

## Integrates

Integrates data into the cloud for easy accessibility and maximum scalability.

## Structures

Structures data based on a semantic understanding of financial transactions.

## Enhances

Enhances workflows with AI, driving rapid learning and system resilience.

AI Suggestions and Automations
Increase the efficiency and accuracy of your financial processes with AI-assisted workflows.

# Platform Features

## Connectivity

### Banks and Payment Processors
Retrieve and push data between banks, payment processors, card issuers, and more.

### Systems of Record
Get and send information between ERPs and internal systems.

**Deeply Connected**
Browse our complete list of integrations.

**View Integrations →**

# Controls

### Approval Flows

Secure payments with easily-configured, granular, sequential approval rules.

### Roles and Permissions

Custom roles and permissions, with full support for SCIM and SSO.

### Audit Trail

Complete, immutable audit logs, that support the integrity of your financial operations.

# Developer Tools

### APIs, Webhooks, SDKs

Modern developer tools for easy, resilient integrations.

### Pre-Built UIs

Seamlessly add payment or onboarding experiences to your products.

# Workflows

### Invoicing

Create, send, and track invoices with built-in payment flows.

### Cash Management

Automate sweeps and get real-time visibility into your cash position.

### AI Suggestions

AI-assisted match and rule suggestions for more complete and efficient reconciliation.

### Exception Handling

Quickly identify and manage exceptions such as data ingest anomalies.

# Business Intelligence

### Reporting

Advanced, easy-to-build reports that can be scheduled or pushed to custom locations.
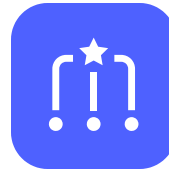

### Alerting

Automated and custom alerts for faster payments, ledgering, and reconciliation.

### Payments

Comprehensive infrastructure to orchestrate bank payments at scale.

Learn more →

### Reconciliation

Leverage AI and reconcile 100% of transactions faster with a self-learning system.

Learn more →

### Ledgers

Track money or any store of value in an accurate, scalable database.
